See "About Payment" on the back page

## ABOUT PAYMENT

All appointments are to be paid for on the day

All investigations and storage are to be paid for within 14 days of invoice.

Treatment is paid for in two steps

- 50% on starting and 50% on completion. Completion is the day of insemination for IUI, the day of egg collection for IVF and ICSI, and the day of embryo transfer for thawed embryos.
- Thawed embryo: RM 1,000 or RM 1,500 on starting and RM 2,500 on completion.

### NOTES ABOUT PAYMENT

- Treatment costs are indicative only and may vary from patient to patient.
- Prices are in Malaysian Ringgit (RM). Prices are effective as at 1st February 2016 until 31st December 2016 but may be subject to change without further notice. Prices do not include GST.
- Payment can be made by cash, cheque, direct debit or credit card.
- The chance of pregnancy is dependent on many factors, as explained in our *Pathway to a Child* magazine – there is no refund if you do not become pregnant, unless you are paying under our Fertility Cover™ option (see below).

## Baby Safe package

The safest way of having a healthy baby is to transfer one embryo at a time – most of the complications for mothers and children come from having twins and triplets.

Our **Baby Safe package** encourages people to choose the safest possible approach to IVF. For an extra RM 1000:

- We transfer the best embryo fresh.
- If you are not pregnant from the fresh embryo transfer, subsequent thawed embryo transfers are free until you have a baby or all embryos are thawed.
- If you do not have any embryos frozen, we will refund the RM 1000.

## Fertility Cover™ package

We are confident of giving you the best chance of a baby, but IVF may not succeed the first time. Our Fertility Cover™ package gives you the reassurance that you will know exactly what the cost will be. The upfront fee covers your first IVF or ICSI treatment cycle and a second IVF or ICSI cycle if you do not become pregnant from the first cycle. If you do not have a baby, we will subsidise the total fee by 50%.

If there are any extra costs (for instance, surgical sperm retrieval), we will tell you before you start treatment.

There are some conditions for being accepted into our Fertility Cover™ package – please call us on 1 300 800 400 to make an appointment.

## Shared Care

In addition to having its own specialist doctors, Fertility Associates also credentials selected fertility specialists to use its facilities. We call this Shared Care IVF treatment.

If you are using a credentialed doctor, you will need to discuss the total cost of treatment with them. The credentialed doctor will usually charge you for consultations, blood tests, ultrasound scans, medications, egg collection and embryo transfer as they occur. Fertility Associates will charge you an embryology fee, which will depend on the amount or type of work done.
